

Habits for Sustainability and Conservation

Food is organic whenever reasonable and available.

Local produce is used whenever possible.

We support and do business with like minded environmentally sensitive businesses. Our favorite is Missoula's [The Good Food Store](#).

We work to maintain a beautiful yard using sustainable products and procedures like; composting lawn clippings, no environmentally unfriendly sprays or fertilizers, dandelion control is done with white vinegar, hand pulling weeds, and by supporting local plant growers.

Recycling ...obviously ...collection bags are maintained on the side porch outside of the kitchen.

Energy star appliances are used including high efficiency large capacity front-loading washers and dryers and dishwashers.

We provide bikes and encouraging walking for visitors with information on trails and other activities that are low impact and preserve the natural beauty of Montana.

Like almost all lodging, we exchange linens and towels responsibly.

Shampoo, conditioners, and soaps are from environmentally conscious businesses. Blossom is a career health and beauty products expert in this area.

Cleaning products are chosen for their "best practice" with both sustainability and respect to humane sensitivity in mind.

We continue to look for more ways to improve because we believe that service, efficiency and sustainability all go hand in hand. Blossom's Bed and Breakfast is more than a place to stay...its leadership in lifestyle.
